

David Solheim

Founder & AI Systems Architect | Teton Web Ventures LLC

Idaho Falls, ID (US Remote) • 208-243-2315 • dts@davidsolheim.com • @davidtsolheim • cursorfieldcto.com

Strategic technical leader and AI adoption specialist with deep expertise advancing software development through AI tooling and multi-agent orchestration. As founder of Teton Web, built and scaled AI-powered platforms and custom agent systems that transform developer workflows—directly mirroring enterprise AI adoption challenges. Cursor ecosystem power user and innovator with experience developing advanced Composer skills and sub-agent orchestration workflows that deliver order-of-magnitude velocity gains. Experienced engaging technical leaders to design adoption strategies and articulate the business impact of AI in software engineering.

CORE COMPETENCIES

AI-Driven Software Development & Adoption
Advanced Cursor, Composer 2.5, custom skills, sub-agent orchestration, multi-agent development workflows, AI maturity framing, and workflow transformation.

Enterprise Client Strategy & Influence
Technical proposals & roadmaps, executive-level client engagement, bridging technical capabilities to business impact, adoption strategy design, and strategy sessions with technical leaders.

Technical Architecture & Platform Leadership
Cursor-first development with Next.js, Vercel, Convex, Neon, and Supabase full-stack platforms; AI-assisted dev tooling evaluation; Cursor, Linear, Slack, and Git integrations; remote/hybrid environments; SaaS architecture.

Rapid Innovation & Execution in Ambiguity
Self-improving agent systems, parallelized development workflows, fast-moving environments, continuous shipping of production AI tooling, and thought leadership on X.

TOOLS & SYSTEMS

- Cursor Cursor Daily Driver
- Composer 2.5 OpenAI Next.js Vercel
- Convex Neon Supabase
- React Native Expo Figma Linear
- Slack Git Stripe Square
- Wasabi/B2

PROFESSIONAL EXPERIENCE

Founder & Lead Developer

Teton Web Ventures LLC | Idaho Falls, ID | February 2026 – Present

- Founded and lead Teton Web, a specialized web development and AI orchestration consultancy delivering high-impact platforms and internal tooling for clients across industrial equipment, global nonprofit, insurance brokerage, and inventor-network markets. Serve as trusted technical advisor and de facto CTO on AI/web strategy.
- Architected and productionized sophisticated AI multi-agent orchestration systems that serve as force multipliers for development velocity, including Slack-based agents, cross-device automation, Linear/Slack task orchestration, and routine-maximization workflows. These platforms demonstrate large-scale AI adoption in complex environments—directly analogous to enterprise rollout challenges.
- Pioneered advanced Cursor extensions, including Composer 2.5 skills that dynamically coordinate parallel sub-agents for issue execution and branch-management workflows. Public demos showed dramatic acceleration, providing real-world proof points for AI maturity and workflow transformation.
- Led high-context client engagements, including major design-system proposal work, international platform/catalog delivery, and alumni-platform strategy facilitation. Full-stack work with Cursor as the daily-driver development environment across Next.js, Convex/Neon, Vercel, and Figma workflows.
- Developing an ambitious all-in-one small business SaaS platform spanning website/CMS/CRM, realtime workflows, and AI. Manage proposals, contracts, financials, and multi-tenant architecture while thriving in ambiguous, fast-paced settings.

KEY TOOLS, SYSTEMS & INNOVATIONS

Cursor Ecosystem: Daily driver and advanced innovator in Composer 2.5 skills, sub-agent orchestration, and Linear-integrated workflows. **AI Agent Systems:** Slack agents, cross-device automation, task orchestration, routine-maximization workflows, and parallel development agents. **Core Stack:** Cursor as the daily-driver development environment across Next.js, Vercel, Convex, Neon, Supabase, React Native, Expo, Figma, Linear, Slack, Git, Stripe, Square, and Wasabi/B2. **Other:** Cursor-first self-improving agent loops, remote dev workflows, SaaS platform development, client strategy, and technical storytelling.

ADDITIONAL

Active public voice on X (@davidtsolheim) sharing practical Cursor innovations, agentic workflow breakthroughs, and enthusiasm for the AI coding singularity—demonstrating executive presence, thought leadership, and authentic alignment with AI devtool missions. Maintains parallel senior W2 development roles alongside founding Teton Web, ensuring ongoing exposure to enterprise development practices. US Remote (Idaho), available for strategic travel as needed.
